Nofantyo Mahendra

Platform Security / DevSecOps Engineer · Secure SDLC · Kubernetes · Incident Response
Jakarta · bukannofan@gmail.com · linkedin.com/in/nofantyo

I build delivery platforms where every release is scanned, signed, verified and monitored, from network to application.

RINGKASAN

Platform & DevSecOps engineer (networking background since 2013) securing the software supply chain end to end: secret scanning, SAST, DAST and image scanning in a shared CI template, signed images (Cosign, SBOM) verified at admission (Kyverno), findings in DefectDojo. Runs production on-premise Kubernetes with GitOps, SIEM (Wazuh) and observability, in financial-sector environments (PNM Holding, Bank Mandiri). CompTIA Security+. Uses AI coding assistants on infrastructure and pipeline code, with every change checked by strict automated tests and review before deploy.

PENGALAMAN

System Engineer / DevSecOps
2023 - Present

PNM Venture Capital · Indonesia

- **Secure SDLC:** One shared GitLab CI template (20+ jobs) checks secrets (Gitleaks), code (Semgrep, SonarQube), images (Trivy) and the running app (ZAP, DAST), consolidated in DefectDojo, with quality gates that block risky releases.
- **Supply chain and access control:** Images signed (Cosign, SBOM) and verified before deploy; Kyverno admission policies and Pod Security restricted in production; 2FA and locked main branches.
- **GitOps platform:** Production on-premise Kubernetes with ArgoCD, Helm and Kustomize for 50+ applications, Sealed Secrets, Longhorn, and dev > staging > prod promotion.
- **Detection and response:** Wazuh (SIEM), Falco, Suricata, audit logging, incident playbooks and runbooks; tested etcd and volume restores; Prometheus, Grafana, Loki, Tempo.

IT Regional Coordinator
2016 - 2023

PNM Holding

- **Team leadership:** Led 10 branch IT staff running IT operations in the region.
- **Infrastructure and network:** Managed infrastructure and networks across PNM Holding.

Network Engineer
May 2013 - May 2016

Bank Mandiri

- **Network infrastructure:** Managed WAN/LAN for head office and branches on Cisco and MikroTik: VLAN, OSPF, BGP, ACL, firewall rules, NAT and bandwidth management.

KEAHLIAN

Security: Secure SDLC, GitLab CI/CD, SonarQube, Semgrep, Trivy, Gitleaks, OWASP ZAP (DAST), Cosign / SBOM, DefectDojo, Wazuh (SIEM), Falco, Vulnerability management

Platform and IaC: Kubernetes, Docker, ArgoCD / Helm / Kustomize, Kyverno, Sealed Secrets, Ansible, kubespray, Harbor, Longhorn

Observability: Prometheus, Grafana, Loki, Tempo, OpenTelemetry, Alertmanager

Infrastructure and network: Linux, Windows Server, VMware vSphere, Veeam, MinIO, Cisco, MikroTik, OSPF / BGP

PENDIDIKAN

Universitas Nusa Mandiri
Graduated 2015

Bachelor of Informatics (S1)

SERTIFIKASI

CompTIA Security+ (SY0-701)

CompTIA · Issued 25 Sep 2026
